WORLD EYES MOLLISON FLIGHT

BRUNO MUST FACE TRIAL IN KIDNAP COURT

Fugitive!

THOMAS ROBINSON.

Said to be a former inmate of Tennessee asylum for insane, Thomas was the man who kidnapped Mrs. Berry Stoll of Louisville. Mrs. Stoll was returned safely after ransom of \$60,000 had been paid.

MANIAC KIDNAP THUG EVADING ALL OFFICERS

Thos. Robinson Believed Heading for West and Orient

By RICHARD RENDELL—LOUISVILLE, Ky., Oct. 20.—Thomas Robinson, the last night was believed heading for California and the Far East, in an effort to escape from kidnapping of Alice Speed, Stoll probably in three or four days.

Sales Of Wives Fall; Price Is Cut

BY GRADE. Oct. 20.—The price paid for wives by the Moslems of South Yugoslavia have fallen heavily.

Because for wives used to be high there was a shortage of them and the Moslems have gone to South Yugoslavia. Numbers of them are actually preparing to go to the Balkans instead of having to be "brought" from their neighbors.

"Dangerous driving" is a usual charge in England since abolition of the death penalty being placed on careful driving rather than slow speed.

MONTAGU MAY FACE CHARGE POOR DRIVING

Confirmation of London Reports Following Death Is Delayed

LONDON, Oct. 20.—It was reported last night a police summons for dangerous driving had been issued to Sir Edward Montagu, youthful son of the Duke of Manchester, as an outcome of his death in an automobile accident.

The inquest's coroner's jury returned a verdict the victim came to his death because he was driving too fast, but that the negligence was not sufficient to amount to manslaughter.

"Dangerous driving" is a usual charge in England since abolition of the death penalty being placed on careful driving rather than slow speed.

American Aces Arrive At Athens

ATHENS, Oct. 20.—Colonel Rescoe Turner and Clyde Pangborn landed here at 4:15 today, after being unreported since their takeoff from Midland Alitrome at 6:30 a.m.

FIRE SUBDUES AT PORTLAND

PORTLAND, Ore., Oct. 20.—Flames roared through the \$1,200,-

000元 worth of the port's

waterfront buildings.

Portland's fire department

and a dozen firemen

spent hours battling

the flames.

Damage was estimated at \$75,000.

CASH BARRED FOR RELIEF

CALGARY, Oct. 20.—Relief officers given to unemployed men and transients will not be used for cash in trade, it was here Friday.

A. M. Mackenzie, head of the Alberta relief commission, Merchants who give part cash for relief orders will be refused payment by the commission.

Relief officers will be used only for food and shelter purposes, Mr. Mackenzie said. The order applies to relief granted in cities and municipalities by the commission.

Named For Office

WASHINGTON, Oct. 20.—Girvan

United States vice-consul at Winnipeg has been appointed vice-consul at Winnipegs, the state department announced today.

Prairie Weather

Beaverlodge	58	48	rain

A heavy area is passing rapidly eastward from Northern Alberta while snow is falling in the mountains. Rainy weather continues in southern Manitoba, while a cold front moves slowly northwardly into Saskatchewan and Alberta.

Manitoba—Partly cloudy and cool, with a high of 54° and a low of 46°. Windy with a few scattered showers that become more numerous with northwardly winds Sunday.

Saskatchewan—Partly cloudy and cool, with a high of 58° and a low of 48°. Windy with scattered showers that become more numerous with northwardly winds Sunday.

I think there is no question about it that we are all very worried about the present state of affairs. There is or could be plenty of all the necessities of life for everybody, and yet, with 90 million destitute people in the advanced western nations, we are seeing food destroyed, fish thrown back into

20 PLANES IN GREAT DERBY SOAR IN SKIES

LONDON, Oct. 19.—Hours after the great London-to-Melbourne air derby got under way today, no report had been received of the disappearance of Captain Mollison, nor of Roger, Turner and Clyde Pangborn, foremen of the British and American teams striving for the \$50,000 pot of gold at the end of the trail across half the earth.

These two, however, were believed to be safe, as they were flying in the lead plane, the first to leave the starting point of the route—London to Bagdad—in one hop, in which case they had been flying for 12 hours.

The other entrants, stopping at intermediate points for refueling or adjustments, the Dutchman, the Frenchman, and the Americans, had taken time to get into position.

Of the other entrants, stopping at intermediate points for refueling or adjustments, the Dutchman, the Frenchman, and the Americans, had taken time to get into position.

At the late hour, the British team had started its race, leaving the Americans behind.

At the late hour,

PLANES AWAY IN BIG RACE TO AUSTRALIA

Continued from Page One
and 20 planes started away today to a perfect start in the England-to-Australia air derby. Sixteen minutes after Mr. and Mrs. James A. Mollison took off from London, the last of the entrants took away, leaving only the withdrawn craft of Capt. C. G. Smith. It was this emphasis the emptiness of the hangars.

The race of all machines quickly climbed to a considerable height, doubtless on account of the massing of the drivers and crews from the aerodrome.

Over most of France conditions were less favorable. For low clouds and occasional rain or drizzle were reported.

Further along toward the Balkans, the Air Ministry reported fine weather conditions. But although one of the optional stops has less favorable views. In nothern Greece the temperatures were high with a heavy snowfall.

GLORIOUS SUNSHINE

Winds in southern France and across the Pyrenees gave the ministry's advice to fly 20 miles an hour up to 4,000 feet.

The sun shone brightly before a glorious autumn sunrise shone on the hardy entrants who took an hour to reach the first optional stop between the cliffs of Hastings and Dungeness.

The first foreign sight in the deserted hangar was the green mustache of Col. Filizmairre. He was smiling broadly because he did not want to make changes required of him which would reduce his speed.

The machines taxied to the starting line just as dawn broke. The plan was to start at 6 a.m. given by Sir Alfred Bowler, acting Lord Mayor of London. It started away generally into a bank of heavy clouds.

The longer route for the flyers down the coast of Europe required points 12,277 miles. These optional landing places are: Rome, Athens, Aleppo, Bushire, Jask, Karak, Jodipin, Calcutta, Bangkok, Agra, Star, Batavia, Tanjongkarang, and Narromine. The top hop points are 400 miles apart.

At 6:48 a.m. all of the planes had made successful takeoffs and the race was under way around the globe with public gathered.

PEOPLE EVERYWHERE

The first sight of an unfastened hangar, silhouetted against the morning sky, was crowded with spectators who waited for every vanishing point.

There were others as the planes passed, but the first were drawn by the roar of the motors. It was a cosmopolitan crowd cut to see the first flight of the great adventure. Women in evening dress, out from London, mingled with men from other countries.

The Americans, Clyde Pangborn and Capt. E. V. Turner, were among the earliest to land. They taxied immediately to the oil house where they began to warm up their supply of oil.

The community of Mildenhall, if it slept at all, did so with one eye open, and the people who had the time of their lives to man the team of numbers of persons to participate in the race was 47.

England's 12 planes were destined to have the 20 starting planes line up in two rows for the start, the last plane taking off 45 seconds after the first machine in the first row. They were to start alternately from the two rows.

A spokesman for the backers of Col. Filizmairre said that the first to leave the British Swoop would attempt a record flight to Melbourne without a full load "as soon as possible but not later."

Filizmairre and his co-pilot, Eric Bonar, insisted, however, they were prepared to leave immediately after the official starters had cleared the field.

LITTLE LITTLE

The backers decided that the pilots, failing to get rest because they had been subjected to nervous strain because of the last-minute change of departure.

WORLD'S GREATEST SKY ADVENTURE

11,323-Mile London-Melbourne Air Derby Over Deserts, Mountains, Lures Pilots

London, Oct. 20.—Across deserts, mountains, oceans and over open seas, roaring through the hot blasts of deserts and skirted by lofty mountain peaks, about sixteen planes managed the world's crack aviators to winging on the greatest race in aviation's history.

Although nearly a score of Americans originally were scheduled for entry in the 11,323-mile London-Melbourne derby, the hope of the United States centers in one or two sites—Col. E. V. Turner, holder of records for transcontinental dashes, and Clyde Pangborn, the world flyer and the first to span the Pacific non-stop.

They are away today from Mildenhall Aerodrome, the Royal Air Force base near here. Flying steadily, it is believed likely that they will be landing at Melbourne, Australia, on the fourth day. To the visitors in the small British town, speed will go \$30,000 posted by Sir Macpherson Robertson, Australian tycoon. The other, other phase of the same race will be flown under handicap conditions which take into account plane relative efficiency. A first prize of \$10,000 will go to the pilot of the best aircraft according to weight, wingspan, fuel capacity, and other forms best according to weight, wingspan, fuel capacity, and other forms best.

SATURDAY, OCTOBER 20

NOT ALL CONTRACTS ARE "SACRED"

Sir William Mulock, Chief Justice of Ontario, addressing the Canadian Bar Association on a recent act of parliament which declares that a judge shall cease to hold office on reaching the age of 70 years.

"...objectionable features of that Act was its application to judges who had been appointed for life and were then in office, and who, in breach of contract with them, were to be dismissed without cause on reaching a certain age."

Whether or not a contract is "sacred" apparently depends upon what the contract is for. If the contract is to pay a certain rate of interest, tax free, to war-protectionists who lent money to the Government, it is "sacred"; and if the contract is with a man who allows his name to be used, it is "sacred".

But if the contract is for that Act was

passed, it is not "sacred".

It is the opinion of many that the

Government has no right to change a

certain feature of a contract.

Whether or not a contract is "sacred" apparently depends upon what the contract is for. If the contract is to pay a certain rate of interest, tax free, to war-protectionists who lent money to the Government, it is "sacred"; and if the contract is with a man who allows his name to be used, it is "sacred".

But if the contract is for that Act was

passed, it is not "sacred".

It is the opinion of many that the

Government has no right to change a

certain feature of a contract.

The judges made mistakes when they accepted appointment to the bench. They should have stayed in law practice and put their earnings into Government bonds. Then they would have got "sacred" contracts which parliament would not upon any consideration change. Money rights are inviolable; human rights are not.

THE MONOPOLY "CURE" FOR DEPRESSION

While no action has yet been taken, rumors are persistent that the egg and poultry business in western Canada is to put under the monopoly of the federal government. This was made at the recent session of parliament, it is to be supposed the Natural Products Marketing Act was passed with the intention that it shall be put into effect, and those who produce and trade in eggs and poultry will be liable to be liable as any others to be selected for the first application of its tyrannical provisions. The public may therefore as well begin to familiarize themselves with the Act, and picture the conditions under which they will be allowed to produce eggs and buy hens and poultry should these rumors materialize.

The Act is a plain measure of communism: through the benefits, if any, are to go to a class, not to the individual. It will also, presumably, take away the freedom to produce, buy and sell such products as are brought under regulation, and subjects these processes to the orders of a Dominion Marketing Board. This body is given power:

"To regulate the time and place at which, and to designate the agency through which, the regulated product shall be marketed, to determine the manner of distribution, the quantity and quality of the class of regulated products that shall be marketed by any person at any time, and to prohibit the marketing of any of the regulated product of any grade, quantity or class."

This is enough surely. Stalin could ask no more. But a half dozen sub-clauses are added to make sure that nothing is omitted to make the control of the board complete to the last detail, with penalties provided for non-compliance of any kind.

The board of course is authorized to raise funds for its purposes; by imposing such charges and tolls as it may please upon the producers of the regulated product. Which simply means that the Minister can fix the number of hens he keeps, or on the number of eggs they lay, or on both counts.

A product may be declared to be regulated upon petition of two-thirds engaged in the industry of production. The petition must be signed by a majority of petitioners required. The Minister is the sole judge of whether the numbers is sufficient to warrant the granting of the petition. As far as the Act says, there is nothing to prevent the Minister from suspending the complete suppression of their individual rights to sell their own products, on petition of ten, five or even two of their number.

But the Minister does not have to wait for a petition. He can act on his own initiative, declare a product to be regulated, and put the

industry under the grip of monopoly control.

He does not have to hold a poll of producers before doing so or enter. He may do so, if inclined. If not, he functions with the complete freedom of action of a commissar at Moscow, and producers and dealers alike either obey the edict of the board he appoints, pay their taxes or go to jail.

Framed at a time when lack of buying power has depressed the domestic market for farm products as the "blasting" tariff has killed the export market, the act is a piece of legislation as it is the most arbitrary piece of legislation having strangled trade, at home and abroad, the Government now proposes to reanimate the corpus by taking another twist at the rope.

HYDRO MONEY MIS-USED?

It is hard to believe that Right Hon. Arthur Meighen allowed himself to be drawn into a scheme to divert funds of the Ontario Hydro Commission to party scoundrels and political schemers. Meighen is a good man, but he is giffed by nature with a tongue that sometimes provokes the wrath of those who differ with him on public issues. But his opponents have never been known to be other than an honest man, and quite too much to resort to the tactics of a wad-heeler.

The allegation of diverted funds is made by Mr. Stewart Lyon, present head of the Commission, a man who has been serving the public faithfully enough to earn the title of best federal witness against a neighbour. The matter is being submitted to the courts, will be sifted judicially, and the facts made known in due course.

Pending the finding, the public will properly withhold judgment, suspecting that the last minute effort to discredit the Commission, and that a complete presentation of the facts will show the Senator to have been innocent of intentional complicity in the affair. None will hope for this outcome more sincerely than those who cannot share his political views.

Four Years Ago

From the Files of The Edmonton Bulletin

George Purchas, Harry Anthony and B. Williams returned Thursday from their expedition to the Jasper Park, bringing with them specimens of gold quartz, mica, and crabs discovered in the mountains.

D. E. Noyes and A. Coghlan located their quartz claims on the Miette river, and found the quartz to be of excellent quality and color. The first assay of rock from the claims showed \$5.50 of gold to the ton and the second \$7.33 to the ton. The first specimen was float rock and the second from some distance in the ledge. It is probable the locators will sink a shaft on the ledge this winter.

D. Ross exhibited 18 yellow onions at the fall fair that weighed a peck.

Master Henry Sheldis presented Lord Aberdeenship a pie of Saskatchewan gold at St. Edmund's.

J. M. Grogan, well known in Edmonton, has entered into partnership with A. J. Ellis, real estate and insurance agent, Calgary.

Mr. John McDougall of Morley arrived on Monday and left Tuesday for Victoria and Sunday.

The first fall show of the Fort Saskatchewan Agricultural Society was held on Tuesday.

THIRTY YEARS AGO

Washington, D. C.—A committee of investigation into the Siouxem disaster, two local steamship inspectors are slated for dismissal.

They were held guilty of laxity in allowing the vessel to leave.

Boston.—The House of Bishops of the Episcopal church passed a resolution condemning the re-marriage of divorced persons.

Ottawa.—Hon. A. G. Blair has resigned from the chairmanship of the railway commission and from the board. He said he is going to a position which will be more profitable.

TWENTY YEARS AGO

Ottawa.—It is estimated that by the first of next year there will be 80,000 men on the pay roll of the Canadian army, and that the daily war expenditure, now about \$60,000 a day, will rise to \$100,000.

Alberta is asked to provide 1100 men for the second Canadian contingent in a schedule made out by the department of militia and defence.

The Hague.—There are rumors that the Kropotkin books are turning out cannon of 2½ inches each.

London.—A mob attempted to wreck German shops in the district of Deptford.

The legislature decided that the electors of Alberta will decide whether or not the province will have a prohibition measure.

TEN YEARS AGO

Ottawa.—It is estimated that by the first of next year there will be 80,000 men on the pay roll of the Canadian army, and that the daily war expenditure, now about \$60,000 a day, will rise to \$100,000.

Alberta is asked to provide 1100 men for the second Canadian contingent in a schedule made out by the department of militia and defence.

The Hague.—There are rumors that the Kropotkin books are turning out cannon of 2½ inches each.

London.—A mob attempted to wreck German shops in the district of Deptford.

The legislature decided that the electors of Alberta will decide whether or not the province will have a prohibition measure.

Poems That Live

"SHE WAS A BEAUTY"

She was a beauty in her days.

When Madison was President,

And quite coquettish in her ways—

On conquests of the heart intent.

Grenadier, on his right knee bent,

Wooded in her, stiff, old-fashioned phrase.

She was a beauty in the days

When Madison was President,

When Madison was President.

And when your roses where here went

Shall go, my Rose, who date from Hayes,

I hope you'll wear her sweet content.

Of whom tradition lightly says—

She was a beauty in the days

When Madison was President.

When Madison was President.

—Henry Cuyler Bunner.

She was a beauty in the days

When Madison was President.

Breaking The World Deadlock

By E. T. FLETT, K.C.

The world deadlock is reaching the breaking point. The alternatives are re-opening the gates of commerce—or war.

Professional politicians are all set for war. In all the great nations the roar is going up for more war instruments and munitions. Not one constructive effort towards peace has been made by any leading politician in the last sixteen years.

Any one of the great nations could break the world deadlock today by offering reciprocal trade terms to all nations based on the principle that each customer should have both buying and selling rights. There would be no objection to a tariff for revenue—even up to a very liberal revenue—because every nation has to have revenue to maintain government; and a revenue tariff is no more objectionable than any other tax.

A reciprocal trade agreement, to be permanent, on the basis that up to the amount purchased, a purchasing nation should have access to the markets of a selling nation on the basis of paying fifty per cent of most favored nation tariffs so long as sales balanced purchases in each calendar year would break the world deadlock completely. And it would do it. Canada could do it. It is an immense profit of all Canada can gain with great direct benefit to the peace of the world. One nation making the offer would start the whole world thinking and acting.

Even on a selfish basis, the possibility of loss by reciprocity is infinitely less than the certain and ruinous loss which will be caused by another war.

A move for reciprocal trade relations with the whole world is the direct and only insurance against war.

Editor Bulletin: In answer to McGeivin's letter, Oct. 10, in the Mail Bag, under the heading "A REPLY."

Editor Bulletin: In answer to McGeivin's letter, Oct. 10, in the Mail Bag, under the heading "A REPLY."

I had not intended replying to any letters, only wanting to bring to your attention the letter of Mr. Clark and the authorities. However, as I do not wish to be unkind to him, I will do so.

Mr. Clark is a man who is trying to force firms who are complying with the new and paying decent wages, to pay him the same.

Can't you see that the firm in question, and sign my name to it?

I am prepared to back up my statement, and can add a few more details.

Trusting you will be good enough to publish this letter.

McGeivin, 802 - 5th Street, Edmonton.

CANDIDATE FOR MAYOR

Editor Bulletin: I thank you for the news item announcing my candidature for mayor.

I do not want to step on anybody's toes, and I also want to keep the campaign clean.

Mr. Clark and myself have much in common, and I hope to keep him on our team.

The sequence of this line of thought is that just as we are dependent on the finished products of others, so long as we remain a debtor state—not only of the local merchant, but of every local merchant right back to the foreigner.

Consistent with that fact must follow the common sense principle that the power of the people—of the masses—is dissipated back all along the route of such goods, their particular destination.

The sequence of this line of thought is that just as we are dependent on the finished products of others, so long as we remain a debtor state—not only of the local merchant, but of every local merchant right back to the foreigner.

Oliver Henderson was sitting on the front porch—a point that had never been mentioned before—and one, and only one, was sagging. The porch railing was broken, and he was keeping with the rest of the building and the house. When Davis stopped Oliver had just lit his pipe. Both feet remained on the unbroken section of porch.

Mr. Davis sat down on the brick path, and the weeds growing high between the bricks.

"Well, Oliver," he said, "This is a fine place you have here."

"Read about it in the paper. Good thing."

The man is rated to a great extent by the condition of his property. You are on the main highway, and you have a fine house. You paint the house, build a new porch, really ought to fix up your yard, and then you have a fine house."

Oliver was looking about as he spoke. "Yes, and take the weeds out of the garden, too."

The woodshed doors ought to be painted back on, they look terrible leaning against the building like that."

of five-cent fares, when it is proven, over a number of years, that the cost of fares will not produce revenue enough to keep the tracks good condition?" JOHN BULL.

CAR LINES ON 97 STREET

Editor Bulletin: May Knott is reading your article in the Community League to have seen that the city is unable to make track repairs, through lack of funds.

The financial statement of the City of Edmonton, 1934, page 1 shows street railway deficit \$1,497,923.23.

Why then continue this policy

A BEDTIME STORY

Story by HAL COCHRAN

Pictures by GEORGE SCARBO

Brave Scrooge swam like every one in hopes that Duncy would bring him back to shore, and show the pelican away.

He thought he, "cause Duncy's re- turned up to me. As long as there's some water, right in this water I will stay."

He was just as safe as could be

cried. "The bird looks pretty big, but he's not strong enough to fly. I'll hold his strong bill open wide, so Duncy can climb right up on him. Then I'll hold him back to the shore we both will swim."

At this time Duncy felt that he was just as safe as could be

right. Right now it's none of his danged business. Now he's got a cellar full of better vegetables or game birds or whatever, or ganders as thrifty as mine. To heck with the prim'pin' up."

He was some weeks later that Mrs. Hodge was home shopping. She stopped off to call her brother, as usual, in the village, and he was a part and a sort of showplace in the village's most prosperous men's club.

Lucy and her brother chased off the old man to the men's club, and said, "I suppose Oliver's as shiftless as ever, Lucy."

Fat a Danger to Her Heart
Overweight is not merely a matter of appearance; it affects health.
Excess fat robs the system of energy—the internal organs grow lax and flabby, the heart becomes fatigued, undue strain is put on the heart. Here is an instance. A woman writes:

"I have been treated by specialists, who tried to reduce my weight, but to no avail. I am perfectly healthy, but no matter what they gave me, nothing would reduce me. Since taking Dr. Esch's diet, I have lost over 100 lbs., and now I feel great. I have lost, I took it at first for granted that I was not in a world of good, as well as greatly reducing my weight. Before Christmas, I weighed 150 lbs., now I am considerably less—in fact, a coat had worn last year which I have had to take in twice, and now it fits me well to wear it again. I have not really made any difference with my diet, although I eat Kruecken to thank."

(Mrs.) M. S. KRUECKEN
(The six salient points of the diet are to eat the right organs to throw off each day the waste and poison that encumber the system. Then, little by little, the ugly fat goes—away, yes—but surely.)

CARDINAL CLOTHES
Peel and core a citrus and cut into strips. Weigh the fruit and allow one pound of sugar to each pound of citrus. Boil the citrus and syrup, allowing one cup of water to each pound of sugar; cook five minutes, add a few drops of lemon until tender. Remove from syrup and spread out on platters to dry slightly. Add a few drops of orange to the syrup, just enough to flavor. Cut the citrus into thin strips, add the juice and boil until very thick. Add the juice of one lemon to the quart of syrup. Put strips of citrus back into syrup and stir until candies are coated with sugar. Again spread out on a platter to cool and dry.

Slender and Well Shaped Ankles Are An Asset

By GLENDA GLAD
"America's Most Famous Beauty"

Remember those peacock shirts that were considered so hot-tempered in grandy's day? They were the rage, quite daring in those times. But I wonder what the seller of that era thought of the idea of a late cable from Paris, these days? These styles are going to be plenty popular.

It is on skirts mostly that this style is seen. Skirts are snug and sleek-like, but are daringly slit in various places, and are often worn with stockings, and even on the sides. And all of them are going to afford plenty of opportunity, whether you like it or not.

Slender, well-shaped ankles are assets. And they're just as much to be desired in this day of slit skirts as they were in the days of the peacock shirts, especially by their scantiness. For the slit skirt carries a pair of stockings that are bound to lose their grace and swankiness.

When the largeness of the middle of the system, the structure of course, there is little or nothing that can be done about it. And the puffy, due to some acid condition of the system, a physician's advice should be followed. Exercise will strengthen them.

Lie on your back, holding the muscle of the left foot firmly. Cross the left foot over the right, with the toe of the left foot pointing downward, then make imaginary circles with the left foot. Reverse, putting the left foot in the same position and circling the right foot.

Stand erect, legs together, hands on hips. Then, running in place, try

to kick your buttocks with your heels. Your ankles should receive plenty of flexing during this exercise.

On your back on the floor, and bring your knees up to your chest. Hold them close to your body, then pull them down, alternating with each leg, alternating with each leg, alternating with each leg, alternating with each leg.

Cosmetics
Blonde is a soft peach shade of pink. Orange rouge and light lipstick would blend harmoniously with your coloring.

EDITOR'S NOTE: To obtain Miss Glad's complete article on "The New Figure" and "Beauty Culture," write care of Edmonton Bulletin, enclosing a stamped, addressed envelope stamped with a three-cent stamp, and ten cents extra for postage and the cost of printing and handling.

The Debunker
FLOWERS
IN A
BED-
ROOM
AT
NIGHT
ARE NOT UNHEALTHFUL.

Two pictures of the same subject and setting: one made with the lens wide open and the other with the lens practically "stopped down." Note that there is no appreciable difference between the two snapshots taken with wide open lens, while the other shows the distance bridge very well. It is difficult to say which is better, but you want, cut down the lens opening!

PRACTICALLY all cameras, with the exception of the Kodak, have simple models. There are some means of varying the amount of light passing through the lens. Why?

Well, we want to be equal to bright sunlight. Simply because there is so much light in the open sun that, unless you squint your eyes cannot distinguish details. In the dark, however, there is no need to take advantage of every available ray of light.

Cameras and eyes are much alike. Unless you control the amount of light entering the camera lens, you will almost certainly overexpose your pictures. You can do this underexpose when the light is low.

Get out your camera and look at it. If it is a simple box camera, it has a stop, which varies the amount of light passing through the lens, diaphragm, has two possible settings, one for average shots and one for flash shots. The latter is brilliant. In certain other cameras diaphragm settings are arbitrarily numbered from 1 to 16, so that most cameras are able to adjust your snapshooting to light conditions.

The best known system of diaphragm control is the "f" system, used on advanced cameras. In this system, the exposure is controlled by the lens opening, the distance from the lens to the film, and the lens speed. If the lens has a lot of variation from scientific motion at full speed, it is too slow to be accurate in exposure. Happy hunting!

JOHN VAN GUILDER

It is often believed that flowers breathe at night and consume oxygen. This is not true, but the amount of oxygen consumed is not negligible. Some flowers could result. Therefore, the amount of carbon dioxide given off by the flowers at night is greater than the dioxide covered during baking there is no danger of drying out the flowers during the night period. Needs must, say the flower experts, must be met, not more than 300 degrees F. when the time is right.

Familiarize yourself with the various openings ("lens stops") if you want to be technical about it. Many cameras have built-in instruction guides which indicate the proper opening for various light conditions.

Once you have learned how to set your lens properly if you let your eyes be your guide. If you find your lens overexposed, stop the lens down.

If your eyes open wide, make a sensation of glare, use a larger stop.

Stopping down a lens has another effect. It sharpens the image and deepens the field of focus. But, you say, how can this be? Well, the light is being held back.

Simply by increasing the depth of the exposure.

It is the same thing happens to your eyes when you squint, which marks the experienced snapshooter.

But don't let it bother you, if it does, it will bother you.

So, if your camera is about 15 mm. and above, chances are you'll get the picture, and that is the important thing. If your camera is 25 mm. or less, it will automatically take care of a lot of variation from scientific motion at full speed.

Happy hunting!

YES SON! I HAVE TO CORRECT THEM AT HOME! BUT FIRST, I MUST ATTEND A BANQUET THIS EVENING, SO WILL YOU TAKE THEM WITH YOU?

WELL WELL! HERE'S FRECKLES' TEST PAPER... AND IT'S TYPEWRITTEN TOO! HES THE GUY WHO'S TRYING TO BEAT ME OUT IN LOVE AND FOOTBALL!!

I WOULD BE JUST AS BAD IF YOU DIDNT PASS THAT TEST! BECAUSE IF YOU DIDNT YOUR FOOTBALL CAREER WOULD BE ALL BROKEN TO PIECES! AND, YOU WOULDN'T WANT THAT, WOULD YOU? BE A SHAME!!

FAMOUS FOOTBALL FEATS!

ONE OF THE greatest runs ever seen in football involved Jack Elder

The play started in New York in 1929. There had been no score in the first period. In the second, with Notre Dame leading 14-0, Perry, Army's tackle, Carideo punted. Perry, Army's tackle blocked the kick on the 13-yard stripe.

Jack Elder, end on the line on the first play, but was stopped. Chris Capie couldn't pick up much on right tackle. On the third play, Capie got loose from center and ran over to the right. He heaved a pass to Messinger, but Elder was there first—right on the 13-yard line.

Ninety seconds later, he was on the side of the field, almost on the sideline, and never stopped until he had scored. Notre Dame lost 14-13.

Rovers To Produce Big Musical Revue

Arrives Home

COCKBURN McCALLUM,

16-year-old King's Scout of the 41st St. John Ambulance Troop, is about the happiest of the Dominion's 63,000 organized Boy Scouts. He has just returned from a "traveling scholarship" into the Hudson Bay region. On his Bay aboard the Hudson's Bay Company supply ship Nascopie. There he learned to handle gun and distributed supplies for 37 government and trading posts in the vast area covering approximately 12,000 miles during the voyage.

Y. M. C. A. BUSY SPOT FOR BOYS

All boys' department activities at the Y. M. C. A. are thriving under the energetic direction of Mr. Fred Syth. Eight basketball teams have started their fall schedule of games and will play their third game for possession of the championship pennant.

"Invaders" group got their meetings under way this week, with five main groups organized. Leaders of these are: Alvin Sorenson, "The Cat"; Jim Fowler of the "Short Circuit"; Gordon Watt of the "Maple Leaves," and Hazel Stafford of the "Cannons." All the groups are meet Wednesdays evening.

"The Maccano Club," one of the

most popular groups, is meeting Friday night, as also is the "Spokes" club which is giving a series of public speaking under the leadership of Jim Barratt, general secretary of the Y. M. C. A.

St. John's Church Boys Celebrate Birthday With Banquet

All city Rover crews are cooperating in the production of a musical and comedy revue to be presented at the church hall on Saturday evening. The program will feature a musical revue has been written by L. F. C. Pilcher, leader of the Fairview Troop, and Mr. Michael Doherty as director.

The Thirteenth Service of First Presbyterian church have resumed meetings under direction of Sergeant Charles C. Thompson, Commissioner W. S. Beckman and District Commissioner Major E. Clarke were present at the meeting held at the church hall.

Warren's Troop leader, Patrol leaders are Jack Hutchinson, Frank Bridges.

RECEIVE COLORS

The Two-hundred and Wolf Cub of St. John's church celebrated their first birthday at a dinner given on Saturday evening. The Cub Mothers association acting as hostess. Other members in attendance were Commissioner W. S. Beckman and District Commissioner Major E. Clarke who were present at the meeting held at the church hall.

The Sixteenth Troop, under Superintendent J. H. Blythe, received their troop colors with an impressive ceremony. Several Scout officials were present.

ROVER SPORTS

Rovers of the Second Crew, of St. John's church celebrated their first birthday at a dinner given by the den leaders and guides prior to their annual sports which are being held today.

Under the leadership of Eric Johnson, the Eighteenth (Fairview) and Nineteenth (Arden) troops are now specializing in model building. The Fairview troops have a new home in the H. A. Gray school. Assisting Rover Leader Pilcher, Mr. Robinson and Bill Leonard is a patrol second.

The First Rover Crew elected their chief Scout, Lord Robert Baden-Powell, will serve in Edmonton on April 24.

Local Scout and Guide leaders are already beginning to plan the next annual organization meeting. Leader, J. H. Hutchinson, Rover Leader, Tom Weir, and Ted Edwards; secretary, Haze Anderson. Tentative plans will be made at the meeting.

They will be nearing the last day of the month when the Rovers will be in town.

They will be ready to receive their friends for their annual visit to San Francisco on April 6.

Identically, the correct pronunciation of Baden-

Powell is Hayden-Powell.

Scouts Prepare For Chief's Visit

When a young officer, he served in India.

Was the hero of the siege of Mafeking in the Boer War.

Local Scout and Guide leaders are already beginning to plan the next annual organization meeting. Leader, J. H. Hutchinson, Rover Leader, Tom Weir, and Ted Edwards; secretary, Haze Anderson. Tentative plans will be made at the meeting.

They will be nearing the last day of the month when the Rovers will be in town.

They will be ready to receive their friends for their annual visit to San Francisco on April 6.

Identically, the correct pronunciation of Baden-

Powell is Hayden-Powell.

HOLY TRINITY CLUBS ACTIVE

The fall season has seen a rebirth of the Holy Trinity clubs where three groups are now in their full stride. The young men's club, which had been inactive for some time, has come into being only two weeks ago. Vernon Peacock, president, and his club group holds meetings every other Sunday night. Other officers are: Secretary, George G. Gandy; Dorothy Miller, and group leader; Dorothy Jones, Gwen Pearson, Ronalda and Dorothy Miller.

Another active group is the Girls' club, which meets weekly under the leadership of Dorothy Miller. Club Executive officers are: Mrs. Fleming, president; Miss Marion Dalton, vice-president; Dorothy Jones, secretary; and Gwen Pearson, treasurer. The girls' club group held a successful dance in Aracis hall, and on November 2 it will present a program of its own.

The Young Men's Club is continuing to grow, and is soon seeking an augmented membership prior to going into rehearsal for a ministered program.

Bob Thompson is president of an active club which includes: Leonard Dalton, president; Peter Williams, Baronets father, social convenor; Frank Drake, sports; and Bernard Owen, editor.

SCIENCE SIMPLIFIED

The Ninth Planet

Pluto is Now Outermost World in Solar System

Pluto, as photographed by the Lowell observatory. The tiny bright dot indicated by arrow is the planet.

Pluto, indicated by arrow, in the vicinity of the star Delta Gemini, the bright object to the right.

By RICHARD BAYLIS
Central Press Canadian Science Writer

Nepune was discovered through science taking note of the irregularities in the motion of the orbit of Neptune. It was moving so far from the sun that it was in the heavens to from their telescopes, pell-mell out the new planet. Neptune and Neptune's satellite, Triton, were discovered in 1846. Percival Lowell of Ploughboy estate, Arizona. In 1915 he had his telescope trained on the solar system over began to search. It was the ninth planet that he was looking for.

And so astronomers began calculating. They began to look just where in the heavens to from their telescopes, pell-mell out the new planet. Neptune and Neptune's satellite, Triton, were discovered in 1846. Percival Lowell of Ploughboy estate, Arizona. In 1915 he had his telescope trained on the solar system over began to search. It was the ninth planet that he was looking for.

Gadsby Organizes Hi-School Paper

GADSBY, Oct. 20.—The first of High School Hi-Lights, a paper for high school students, is expected to make its appearance this week.

Mr. Dean is editor, Alvin Young, associate editor and Shirley Palmer, class poet.

He was the author of the first book on the subject of the solar system which was published in 1846.

It was the ninth planet that he was looking for.

WENSTOB WINS OVER SAVOLDI ON TECHNICAL KAYO

LEDUC'S REFUSAL TO BOSS FARM SQUAD IS SURPRISE
QUEBEC, Oct. 20.—Lured by the promise of the Quebec government to increase his compensation, Albert Leduc, recently named coach of the Montreal depopulation team, was dissatisfied with terms offered him.
Leduc had agreed on salary terms although the actual signing of a contract had been deferred to Monday, Garneau said. The report Walsh would come here to supplement Leduc was "utterly false."

PRESIDENT OUTLAWS EXHIBITION LACROSSE SERIES

**MAT ARTISTS
WILL PERFORM
HERE FRIDAY**

**Grunt-Growlers At New
Empire Theatre For
Coming Program**

With Billy Spendlove and "Bad Boy" Bob Cummings, the two boys who ended the previous wrestling program with a thrilling riot on the last night, the Mat Artists will return Saturday evening, Oct. 20, and will complete his visit with a lecture on the game in general.

The lecture at the Ingolds club will start at 8:30 p.m. on Tuesday, Oct. 20. Mr. Cummings will talk on single play explaining the game and goes over the various techniques used by the matmen. After this there will be a singles match, while Mr. Spendlove plays against outstanding local talent. After this is over Mr. Devlin will have a short talk and then will then play in a men's doubles and mixed doubles game.

FORT ERIE, Ont., Oct. 20.—Kil Klein, United States speed skater, will be the featured attraction to take part in the winter games. She is holder of the women's 500-metre record and winner of the 1,000-metre race at the 1932 Olympics.

Remembered as those two rough and ready grapplers that caused such a stir at the Empire Theatre last year, the Grunt-Growlers will be a pleasure to watch from start to finish. Promoter Cutcher informs that the Mat Artists, Mr. John Johnson of Denver, Colorado, to tangle with Gil Knutson in a special match, which is expected to be plenty rough and tough, but Gil says he looks forward to the bout with the Mat Artists.

All seats are reserved in the Mat Artists' theatre and an early arrival is assured of a clear view. The admission price will prevail and as usual ladies and children will be admitted at half price.

THE HIDDEN DANGER

most scientific matches shown here to date. These boys will be a pleasure to watch from start to finish. Promoter Cutcher informs that the Mat Artists, Mr. John Johnson of Denver, Colorado, to tangle with Gil Knutson in a special match, which is expected to be plenty rough and tough, but Gil says he looks forward to the bout with the Mat Artists.

All seats are reserved in the Mat Artists' theatre and an early arrival is assured of a clear view. The admission price will prevail and as usual ladies and children will be admitted at half price.

BY ORVILLE E. ATWOOD

Director, Motor Vehicle Division, Michigan, Vice-President, Region No. 3 of American Association of Motor Vehicle Administrators.

THEIR is nothing dangerous than an automobile properly parked in front of a motorist who has just been hit by a truck or bus. So far as I am concerned that car could stand there until it fell apart and no one would be charged against it.

Yet, that same car is one of the most dangerous traps known in modern traffic. It is a deadly menace to the unwary pedestrian and a threat to the driver of the vehicle. This is surely true at all times. This is because heedless pedestrians are apt to walk right in apparent safety in the roadway from behind it directly in front of the moving automobile. Last year, 35,000 pedestrians died according to figures of the National Bureau of Casualty and Surety Underwriters. Of this number, 3,000 were killed while the remaining 32,000 were injured.

It happens sometimes that a pedestrian will come out in front of a moving car and obstruct the vision of the oncoming motorist. He may be near the car and the driver may not see him. It is only one thing for the pedestrian to do and that is to stop walking when he sees that he has seen that the passing vehicle is safe. It is also the duty of the motorist to stop his car just as soon as an emergency arises.

You cannot make people think of danger when they dart out in the street itself for a ball, a hoop, or some other reason. You cannot make some pedestrians take their minds off business when they are walking. You cannot make personal carelessness as they go into a situation like this.

All we can do is to impress upon the duty of the motorist always to regulate his speed so as to give warning against just such a contingency.

THE CURIOUS WORLD

The MUSK-OX

IS A HANGOVER FROM ANOTHER AGE. IT RESEMBLES THE BISON, AND IS A RELATIVE OF BOTH CATTLE AND SHEEP!

AN OUTER COAT OF LONG, COARSE HAIR PROTECTS IT FROM RAIN, WHILE A WOOL UNDERCOAT PROVIDES WARMTH.

A MUSK-OX CALF, BORN IN ALASKA ON APRIL 29, 1934, WAS THE FIRST MUSK-OX TO BE BORN THERE IN THE LAST ONE HUNDRED YEARS. IT IS THE OUTCOME OF A HERD OF MUSK OXEN TRANSPORTED FROM GREENLAND, IN 1930, BY THE BUREAU OF BIOLOGICAL SURVEY.

SPORTSMEN CANNOT JUSTLY FEEL PRIDE IN KILLING A MUSK-OX TROPHY! AS THE BULLS STAND PERFECTLY STILL, GUARDING THEIR HAREMS, THEY ARE BUT LITTLE MORE DIFFICULT TO KILL THAN SO MANY DOMESTIC CATTLE.

THE MUSK-OX DOES NOT MIGRATE SOUTH AT THE APPROACH OF WINTER, BUT LIVES THE YEAR ROUND IN THE ARCTIC REGIONS... THE BLEAKEST TERRITORY ON EARTH... EXISTING ON A SCANTY DIET OF GRASS, MOSS AND LICHENS.

WHEN A HERD OF MUSK-OXEN IS ATTACKED, THE BULLS FORM A CIRCLE ABOUT THE COWS AND CALVES, AND PRESENT AN IMPENETRABLE WALL OF SHARP-POINTED HORNS TO THE ENEMY.

© 1934 BY NEA SERVICE INC.

ALTHOUGH THE MUSK-OX HAS BEEN ABLE TO HOLD ITS OWN AGAINST WOLVES, THERE IS DANGER OF ITS DISAPPEARANCE FROM THE EARTH UNLESS IT IS GIVEN PROTECTION FROM MODERN HUNTING METHODS.

FRECKLES AND HIS FRIENDS

WHAT IN THE WORLD ARE YOU DOING WITH A SET OF GOLF CLUBS? I THOUGHT YOU SAID YOU NEVER WOULD PLAY GOLF!

DOCTOR'S ORDERS... HE SAYS I'M GETTING FAT!!

YOU KNOW HOW I LOVE TO EAT! WELL, HE SAYS I EAT TOO MUCH, AND DON'T GET ENOUGH EXERCISE... SO THIS IS THE RESULT!

I ALWAYS DID SAY YOU GOT YOURSELF INTO AN ILLNESS OF SOME KIND!

NOW, TAG YOU CAN CADDIE FOR ME, AND BETWEEN YOU AND OSCAR, YOU CAN GIVE ME A FEW POINTERS! I KNOW NOTHING ABOUT THE GAME! NOTHING AT ALL!

WHAT'S THE CURE FOR THAT?

By Blosser

Service to its constantly increasing army of readers has brought wide recognition. Its news is brief and pithy, easy to read, accurate and fair, while its

excel in every department. In illustration, comics, women's activities, editorials, sports, serials and short stories, markets, finance, constant improvement has made The Bulletin
